

# CENTRAL LAB SERVICES

*Because our labs are closer to your investigator sites, samples travel shorter distances for better cost and operational efficiencies.*

## TESTING SERVICES

- General safety
- Molecular diagnostics
- Specialized oncology assays
- Biomarker analysis
- Pharmacokinetic analysis
- Method development and validation

## CLINICAL TRIAL SERVICES

- Project management
- Data management and reporting
- Kit building
- Logistics
- Sample tracking and logistics
- Quality assurance
- Scientific Operations Support contract staffing

A worldwide network of leading laboratories without borders.

*With more than 25 locations around the world and central laboratory capabilities on six continents, we put you at the center of a global network of some of the world's most prestigious laboratories. LabConnect provides both routine and highly specialized testing, supporting everything from single-site studies to large multinational trials.*

With more than 4,000 validated tests across our network, LabConnect can handle everything from general safety testing to the most complex molecular diagnostics and biomarker analyses. Our extensive test menu includes a broad range of validated assays and diagnostic platforms, and we also provide method development and validation services.

What sets LabConnect apart is our blend of local resources and global capabilities. Experienced project managers coordinate global logistics with local contacts to give you both a single point of contact and knowledge of regional customs and regulatory requirements. Additionally, because our labs are closer to your investigator sites, samples travel shorter distances for better cost and operational efficiencies. Our state-of-the-art, aliquot-level, sample management system, SampleGISTICS™, keeps track of your samples from collection through biostorage with full sponsor visibility.

*Experienced project managers coordinate global logistics with local contacts to give you both a single point of contact and knowledge of regional customs and regulatory requirements.*

## LABORATORY HARMONIZATION

LabConnect harmonizes method calibrations throughout our network to ensure accurate and consistent results worldwide. Program components include:

- Common reference intervals
- Common Internal Quality Control (IQC) samples for monitoring analytical precision
- Baseline assessments of analytical performance using common sets of human serum samples covering the clinical range of interest for the analytes measured

## GLOBAL NETWORK, LOCAL RESOURCES

- North America
- Central & Eastern Europe
- India & Southeast Asia
- Australia
- South America
- Africa

## ABOUT LABCONNECT

Founded in 2002, LabConnect provides global central laboratory services including routine and esoteric laboratory testing, kit building, sample management, biorepository and scientific support services for biopharmaceutical and CRO clients. LabConnect's unique combination of state-of-the-art technology, world-class laboratories, easy access to emerging markets and extensive specialized testing expertise means the drug development industry can rely on a single provider for all of their central laboratory service needs.
