

CLINICAL KITS

When it comes to clinical kits, investigator sites consistently rate LabConnect as the top performing laboratory.

KEY FEATURES

- Every kit is custom built for your site and protocol
- Ambient, refrigerated, frozen and combination kits available
- Kits specifically designed for ambient room temperatures all the way down to -150° Celsius
- Shippers have customized, pre-formatted air-bills attached
- Collection tubes are pre-labeled to minimize errors
- Contents arranged in an absorbent wrap in proper order (the way you want samples drawn)
- Detailed instructions are provided in a laboratory manual customized for your study
- Specimen collection/handling instructions are included on each visit-specific requisition
- 99.8% of collection kits and supplies are sent on time to site

Allow your investigator sites to focus on the subjects and not processing kits.

Clinical kits from LabConnect make an investigator's job easier by eliminating guesswork, saving time and reducing the risk of error. We offer turnkey solutions for even the most complex trials.

Whether you need one kit or thousands, LabConnect's approach remains the same — we will custom-design and custom-build a kit to match your needs. With a 15,000-square-foot kit-building operation and a highly experienced, dedicated team, LabConnect will quickly provide ambient, refrigerated, frozen and/or combination kits and deliver them on time to your site. Plus, our kits and shipping packages are completely turnkey. Tubes are pre-labeled and held in an absorbent wrap in the order you want to draw samples. Shipping containers are pre-labeled. Detailed instructions are provided in an enclosed manual. All of this preparatory work saves your team hours in sorting out and organizing kits. And your team will never have to do any paperwork.

SUPPLIES

- Visit-specific kits include all collection and shipping materials required for each visit
- Customized laboratory requisition forms meet your protocol and visit requirements
- Resupplies are typically shipped within three to five days of request

ABOUT LABCONNECT

Founded in 2002, LabConnect provides global central laboratory services including routine and esoteric laboratory testing, kit building, sample management, biorepository and scientific support services for biopharmaceutical and CRO clients. LabConnect's unique combination of state-of-the-art technology, world-class laboratories, easy access to emerging markets and extensive specialized testing expertise means the drug development industry can rely on a single provider for all of their central laboratory service needs.
