

ONCOLOGY TESTING

LabConnect's worldwide network of leading laboratories has the capability and expertise to ensure the success of your next global oncology trial.

Focused early-stage oncology testing services from the world's local central lab.

LabConnect has extensive experience managing early-stage oncology trials and offers an array of services specifically tailored to meet the needs of your most complex studies.

LABORATORY CAPABILITIES

- Specialized oncology assays
- Broad analytical capabilities, including
 - Routine safety testing
 - Cytogenetics
 - Flow cytometry
 - Immunohistochemistry
 - Genetics
 - Circulating tumor cell analysis
- PBMC isolation
- RNA/DNA extraction
- Proprietary sample tracking system, SampleGISTICS™
- Custom designed collection kits
- Dedicated project management
- Scientific project management services
- Logistics

Our ability to meet your needs around the globe and our experience in oncology-related indications such as breast cancer, lung cancer and leukemia mean your trials will run more efficiently. By consolidating your global clinical testing needs with LabConnect, you can achieve new levels of data visibility and integrity, from study startup to closeout.

LabConnect's worldwide network of leading laboratories has the capability and expertise to ensure the success of your next global oncology trial.

ABOUT LABCONNECT

Founded in 2002, LabConnect provides global central laboratory services including routine and esoteric laboratory testing, kit building, sample management, biorepository and scientific support services for biopharmaceutical and CRO clients. LabConnect's unique combination of state-of-the-art technology, world-class laboratories, easy access to emerging markets and extensive specialized testing expertise means the drug development industry can rely on a single provider for all of their central laboratory service needs.
