

GLOBAL SAMPLE PREPARATION SERVICES

SAMPLE PREPARATION SERVICES

- PBMC isolation and cryopreservation
- DNA, RNA extraction
 - Nucleic acid extraction from whole blood, PBMC, fresh or flash frozen tumor tissue, FFPE and other sample types
- Aliquoting services
- Access to qualified sample processing services globally through our global laboratory network
- Strategic focus on decreasing TAT for optimal PBMC processing outcomes worldwide
- Centralized global monitoring of specimen processing metrics
- Validated shippers to ensure temperature-controlled transport
- Cryogenic storage (-190° C)
- Biomedical freezers (-20° C and -80° C)
- Controlled-room-temperature and 2-8° C storage
- Monitoring of temperature, humidity, shock, exposure and location in transit

LabConnect offers a comprehensive global solution for your sample preparation and processing requirements.

Given the rapid growth in immuno-oncology, cell-based and gene therapies, high-quality and expeditious sample processing is required within today's trials. Balancing turnaround time requirements with the desire for processing consistency across global sites is an industry-wide challenge.

With more worldwide locations than any other central laboratory services provider, LabConnect significantly minimizes shipping time from site to processing lab, optimizing viability for time-sensitive samples. Our proprietary packaging, standardized analyst certification and centralized performance monitoring combine to ensure global consistency. Our web portal provides you with easy access to study-wide sample processing quality metrics.

In addition, our customized approach facilitates validation and implementation of sponsor-specific protocols. After processing, our global biostorage and logistics support ensures sample integrity throughout the biospecimen cold chain. LabConnect's global sample preparation network supports your global research protocols by offering reliable worldwide sample processing.

ABOUT LABCONNECT

Founded in 2002, LabConnect provides global central laboratory services including routine and esoteric laboratory testing, kit building, sample management, biorepository and scientific support services for biopharmaceutical and CRO clients. LabConnect's unique combination of state-of-the-art technology, world-class laboratories, easy access to emerging markets and extensive specialized testing expertise means the drug development industry can rely on a single provider for all of their central laboratory service needs.
